

ROLE-ALIGNED EXECUTIVE PROFILE

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes. Brings direct AI readiness and workflow-governance design together with high-reliability engineering, quality systems, regulated autonomy, and scaled operating execution.

Enterprise AI strategy	AI and data governance	Human-in-the-loop systems
Portfolio prioritization	High-reliability operations	Cross-functional adoption

Selected leadership experience

Vape-Jet 2025-Present

Director of Operations

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/ Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

DudeWorth 2017-Present

Founder / AI and Automation Advisor

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, autonomous mobile robots, transportation systems, network analysis, and workflow design.

Amazon 2014-2018

Operations Management / Site Leader

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms across safety, quality, customer experience, and team engagement.
- Served on the Amazon Prime Now launch team with Whole Foods and contributed to logistics innovation through Prime Air research and Amazon Flex geolocation concepts.

Compunetics2000-2013

Director of Operations and Engineering Management

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls; collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD.

ZeusVu2018-2022

Chief Pilot, Autonomous Systems and Aerial Data Operations

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

Cardinal Building Products2021-2023

Regional Director

- Built the company's first remote regional operation and modernized distributed CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

Enviro Social Capital2014-2017

Chairman of the Board

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

AI governance operating toolkit

- Use-case intake and portfolio triage
- AI readiness and value-feasibility assessment
- Data lineage, quality, and stewardship requirements
- Human authority and escalation design
- Evaluation, testing, monitoring, and decision records
- Risk, privacy, security, and adoption integration
- Executive scorecards and operating cadence

Technical toolkit

Agentic AI · LLM workflows · RAG patterns · Human-in-the-loop design · Python · SQL · JavaScript · TensorFlow · Tableau · ERP/Odoo workflows · Jira · Confluence · HubSpot · Slack · GIS and mapping workflows

Education

University of Pittsburgh

Bachelor of Science. Academic grounding includes materials science, physical chemistry, and biology-related studies.

Google Scholar profile

Credentials

Google AI Essentials

Food Safety Management

IBM Enterprise Design Thinking Practitioner

Six Sigma Certification

OSHA 10

Leadership through-line

High-reliability engineering and quality → scaled customer-backward operations → regulated autonomy → AI-first operating transformation and governed workflow design.
